MADEPLAST
MADE TO LAST

WPC MADEPLAST

NANOTECHNOLOGY TO CREATE A UNIQUE PRODUCT

By combining wood with a high-density polymer, MADEPLAST developed a unique product, the **WPC MADEPLAST**.

Its technology is **100% Brazilian**, and it has been patented in the USA and in BRAZIL and approved by the main evaluation quality centers.

It has a woody texture and similar characteristics to natural wood.

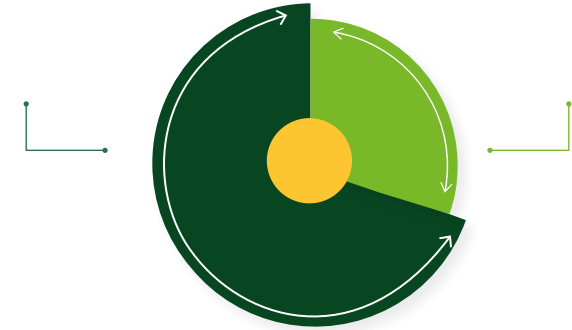

It meets all technical demands when it comes to **quality, durability and sustainability**.

70%

Recycled wood with additives that stop its material from being deteriorated by pest or the action of time.

30%

High-density polymer that brings humidity resistance and avoids deformation.

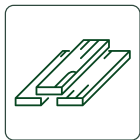

Thermic comfort

It gives greater thermic comfort than common plastic woods.

UV protection

It does not fade and it dismisses varnishing, even for external areas.

Natural wooden look

Its texture and grains are similar to natural wood.

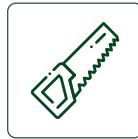

High durability

Our products have durability beyond expectation.

Anti-pest

It does not suffer with the attacks of fungi or pests, such as termites.

Can be customized

It can be cut, screwed and painted with woodworking tools and wood paints

Stability

Since it has a high-density polymer, WPC Madeplast does not deform, and offers much more resistance and stability.

COLORS AND TEXTURES

To ensure more beauty and refinement to your architectural project, our lining line has exclusive textures, as well as several colors approved and tested by Architecture, Design, and Landscaping professionals.
